

# 4x32 COMPACT DAY-NIGHT SCOPE WITH GREEN LASER

The reticle is designed to allow you to make a precise shot on target very quickly without having to adjust the target knobs. Knowing the distance helps you in aiming on target. However if the distance is not known, you can use the rapid ranging reticle to estimate the distance. The scope is great in close quarter battle (CQB) scenarios for quick and precise acquisition.

## FEATURES

- Equipped with fiber optic sight for quick acquisition
- 100% shock, recoil, fog proof, nitrogen filled
